

Cradle-to-Career Data Governing Board Staff Report

Date Report Issued: August 6, 2024
Attention: Members of Cradle-to-Career Data Governing Board
Subject: **Schedule of Future Data Providers**
Staff Contact: Marykate Cruz Jones, Chief of Strategic Initiatives and Partnerships

At this meeting, members of the Governing Board (Board) will have the opportunity to learn about the scheduling of future data providers.

Requested Action:

There is no requested action for this item. This is an informational item only.

Background:

At the August 9, 2023 Board meeting, past Cradle-to-Career Data (C2C) Chair Fong proposed the implementation of a standing item at each Board meeting, inviting Data Providers to provide updates to fellow Board members and the public. At the November 1, 2023 Board meeting, the Office presented on the [scheduling of data providers](#) for Board meetings up through November 2024.

Updates from Data Providers have allowed Board members the opportunity to report about all the important work their appointing authority has completed or is underway to advance the data system. It has also illuminated how the State's investments in this work go beyond the work of the Office of Cradle-to-Career Data (Office) and include necessary and important effort, expertise, and resources at each of C2C's Partner Data Providers. As Board members have found these presentations beneficial to understanding the work of C2C's Partner Data Providers, the Office, in collaboration with Chair Payne, have decided to continue the tradition of data provider presentations at future 2025 Board meetings.

Presentation Content:

In keeping with previous data provider presentations, the presentation should provide fellow members and the public with an idea of how the data provider is collaborating with and supporting the data system. Topics covered may include workflows, data reporting, data projects, communications projects, system improvements, and how resources are being deployed. The presentation can also highlight any unique insights into the world of the data provider or other useful publicly available data or resources. Topics may also include presentations given that relate to the work of the data system or projects worked on in tandem with the Office.
